

Ayushmaan Mishra

Full-Stack Developer | MERN Stack | TypeScript | FastAPI | PostgreSQL | Blockchain Integration

+91 9149084611 | ayush8171wiz@gmail.com | github.com/wiz0007

PROFESSIONAL SUMMARY

Final-year Computer Engineering student and Full-Stack Developer focused on MERN stack, TypeScript, FastAPI, REST APIs, JWT authentication, PostgreSQL/MongoDB, and blockchain-backed web applications. Experienced in building end-to-end projects with secure authentication, role-based access, database-driven workflows, responsive React interfaces, and API testing. Targeting Full-Stack Developer, MERN Stack Developer, Backend Developer, and Software Developer fresher roles.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, TypeScript, PHP

Frontend: React.js, HTML5, CSS3, SCSS, responsive UI development, reusable component design

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT authentication, role-based access control

Databases: MongoDB, PostgreSQL, schema design, database-driven application workflows

Blockchain: Polygon Amoy, anchored transactions, Web3 basics, transaction verification concepts

Tools: Git, GitHub, Postman, API testing, debugging, deployment fundamentals

PROJECTS

SkillSphere - Final Year Project | *TypeScript, MERN, FastAPI concepts, PostgreSQL/MongoDB, Polygon Amoy*

- Built a skill-sharing platform with secure authentication, role-based access, scalable backend APIs, and database-backed user/project workflows.
- Integrated blockchain-backed anchored transactions on Polygon Amoy to support tamper-aware records and transaction verification.
- Structured the application around reusable frontend components, API-driven flows, and maintainable full-stack project modules.

E-Commerce Application | *MERN Stack, REST APIs, authentication, payments*

- Developed product, cart, user authentication, order, and payment-integration workflows across a React frontend and Node/Express backend.
- Designed API routes and database interactions for common online shopping flows, improving backend and state-management experience.

Community Chat Application | *MERN Stack, real-time communication, authentication*

- Created a real-time chat platform with secure user access, message workflows, and reusable frontend/backend components.

Fantasy Game Application | *Full-stack web app, live-score logic, team management*

- Implemented team selection and live score-based point calculation workflows for a fantasy gaming experience.

Hotel Management System | *Backend-driven booking and customer management*

- Built room booking, customer record, and management workflows with API-oriented backend structure.

Portfolio Website | *React.js, SCSS, responsive design*

- Designed and developed a responsive portfolio to showcase projects, skills, and developer profile across screen sizes.

EDUCATION

B.Tech, Computer Engineering: College of Technology, Pantnagar | 2022-2026

Intermediate, PCM: Shivalik Holy Mount Academy, Kashipur | 96% | 2021

CERTIFICATIONS

Web Development - Internshala | Python - Internshala | C & C++ - Internshala | Core Java - Internshala

INTERVIEW-RELEVANT STRENGTHS

- Comfortable explaining full request flow from React UI to REST API, authentication check, database operation, and Postman testing.
- Strong understanding of backend architecture, API design, secure authentication systems, debugging, and deployment fundamentals.
- Hands-on exposure across frontend, backend, database, authentication, and blockchain verification concepts through project work.
- Prepared for fresher interviews covering OOP, DBMS, JavaScript/TypeScript, React, Node.js, REST APIs, and project architecture.
